

stair edging profile for tiles

stair+tec™ FSF

Ceramic tile laying jobs may sometimes be quite delicate with problems which differ from standard applications such as linear wall tiling. Stairs, for instance, to be covered with the same tiles as the floor may require non standard spacing to match different heights from step to connecting floor for example.

The STAIRTEC product range is conceived to face these adjustment problems by featuring valid and lasting technical solutions.

Illustrated scale dimension 1:1
